EXPERIENCED TECHNOLOGIST - UI ARCHITECT

With over 17 years of engineering experience in all cycles of software development & delivery, I'm an enthusiastic technologist confident in providing architectural design and development solutions for scalable applications.

My latest stint at Optobizz Software Private Limited provided opportunities to develop web & mobile applications for the Indian SMB market.

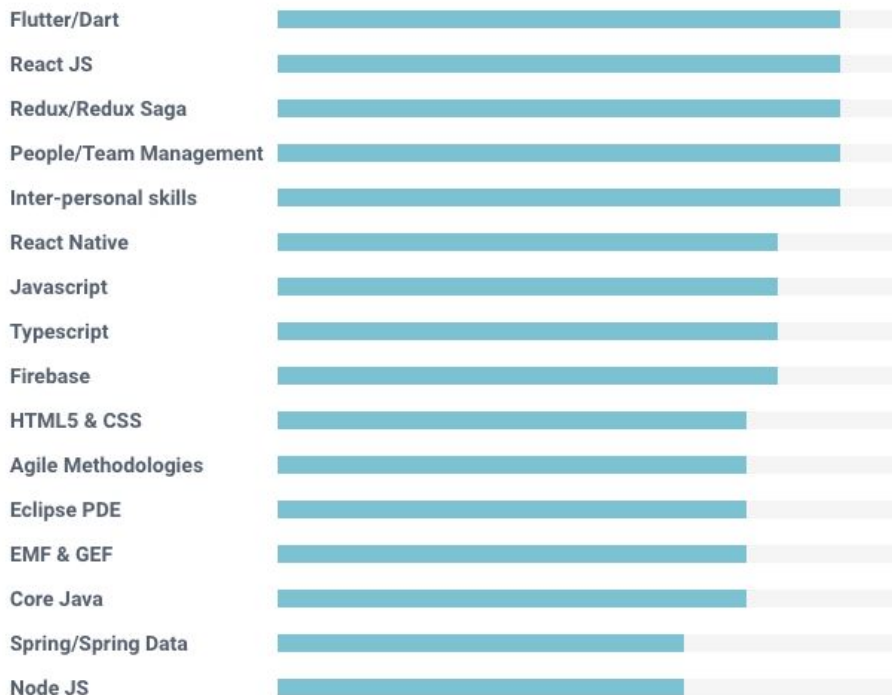

Having continued being a developer, I'm able to contribute to the design aspects much more thoroughly.

I'm very interested in the expressions of scale and building large distributed systems to solve problems tidily.

I've led teams to work together, understand each other, and drive value towards achieving goals of the organizations that I've been part of.

Along with being a quick learner, I'm also an adaptive individual who's always tried to understand the customer's larger goal and provide value at every step

SKILLS & PROFICIENCY

EXPERIENCE

Co-founder, Architect, Designer, Developer Oct 2017 - Present

Optobizz Software Private Limited, Bengaluru, India

Architected products & solutions delivered by Optobizz.

Designed and developed all the products under the Optobizz umbrella along with driving team value

Strong involvement in Business analysis, sales, & marketing cycles along with developing the culture of the organization

Lead Developer

April 2014 - Sept 2017
